## Circuits & Circuit Theory

A/d converter module keeps speed high but cuts costs by 50%...PF, ED 5, p. 80

A/d converter's dynamic range...ART, ED 3, p. 76

A/d converters with accuracies to 0.0015% drop prices sharply...PF, ED 26, p. 82

Agc extends the range of a/d converters...ART, ED 22, p. 108

Agc provides 0.1% amplitude stability for Wein-bridge oscillator...IFD, ED 11, p. 94

Active filter improves tracking and capture ranges of PLL...IFD, ED 7, p. 128

Add-to-accumulator circuit uses a minimum of external hardware...IFD, ED 1, p. 120

Analog circuit specialists battling to survive the digital onslaught...NEWS, ED 6, p. 32

Analog-input multiplier/divider provides 3-1/2 digit output...IFD, ED 12, p. 92

Apply topological graphs...ART, ED 9, p. 84

Audible alarm tells when car lights are on and ignition switch is off...IFD, ED 12, p. 94

Autoranging amplifiers...ART, ED 22, p. 114

Beware of CMOS-switch failure modes...ART, ED 6, p. 68

Build a linear, high-frequency detector with low offset and wide dynamic range...IFD, ED 12, p. 98

Build a multiphase clock that never loses its sequence...IFD, ED 6, p. 95

Build dc/dc converters that work...ART, ED 11, p. 82

Build high-speed sync-pattern detectors...ART, ED 21, p. 82

CAD speeds matching of antenna networks...NEWS, ED 22, p. 22

CMOS audio amplifier features ±15-dB bass/treble control range...IFD, ED 11, p. 93

CMOS switch inverts analog signal under control of digital logic...IFD, ED 25, p. 92

Calculate capacitor tap impedance with correct expression and avoid errors...IFD, ED 8, p. 82

Capacitor drops voltage with little heat for low-cost, low-voltage power supply...IFD, ED 24, p. 148

Catch missing codes...ART, ED 16, p. 58

Choose switching regulators...ART, ED 6, p. 54

Circuit eliminates switch bounce in keyboards and gives latched output...IFD, ED 1, p. 118

Circuit turns on tape recorder only when sound is detected...IFD, ED 20, p. 100

Complete phase-locked loop made from part of a quad EX-OR gate...IFD, ED 7, p. 130

Consider MSI for tape controllers...ART, ED 16, p. 50

Consider using resolvers and synchros...ART, ED 17, p. 70

Constant period with variable duty cycle obtained from 555 timer with single control...IFD, ED 14, p. 72

Convert 7-segment numerical code to decimal or BCD outputs...IFD, ED 4, p. 96

Crystal control of a one-shot ensures accurate pulse-width output...IFD, ED 24, p. 150

Crystal oscillator provides low noise...IFD, ED 21, p. 98

Current limiter added to power supply protects sensitive circuits...IFD, ED 3, p. 86

Current sinks increase the range of IC function generators...IFD, ED 26, p. 74

Dc/dc converter shrugs off 6:1 input voltage changes...PF, ED 21, p. 133

Dc/dc converters tolerate 2:1 input-voltage swing...PF, ED 8, p. 102

Damper diodes: Do you need them?...ART, ED 6, p. 62

Deglitching modules attenuate glitches on current-output d/a's by over 70 dB...PF, ED 24, p. 162

Design a precision a/d converter...ART, ED 8, p. 66

Digital circuit detects frequencies within adjustable difference band...IFD, ED 14, p. 70

Divide a digital signal by any digit from 1 to 9...IFD, ED 1, p. 120

Drift-free integration with a v/f converter and digital counter...IFD, ED 18, p. 110

Dual-voltage regulated power supply has adjustable outputs that track...IFD, ED 25, p. 94

Easy-to-build FM signal generator uses a phase-locked loop and an AM input...IFD, ED 4, p. 94

FET analog-switch circuit provides 63-dB on-off ratio...IFD, ED 24, p. 146

Fast settling op amp delivers up to 100 mA...PF, ED 7, p. 80

Field-PLAs simplify logic designs...ART, ED 18, p. 84

Floating regulator gives 0.1% regulation over 0-to-100-V-dc, 200-mA range...IFD, ED 19, p. 94

FOCUS on Operational amplifiers...SR, ED 14, p. 44

FOCUS on Switching power supplies...SR, ED 20, p. 52

FOCUS on Uninterruptible power supplies and inverters...SR, ED 10, p. 100

Function generator produces sine, square and triangular waves...IFD, ED 3, p. 88

High-isolation amplifiers handle up to ±2500 V, common-mode...PF, ED 13, p. 124

High-speed switch handles ±400-V peak and is controlled by logic levels...IFD, ED 2, p. 74

High-voltage power supply from 5-V source regulated by timer feedback circuit...IFD, ED 7, p. 132

Hybrid IC converter series gives high speed at low cost...PF, ED 6, p. 112

Impedance matching made easy: a 3-step uncomplicated method...IFD, ED 17, p. 76

Improved voltage-to-frequency converter has automatic polarity inversion...IFD, ED 11, p. 96

Inexpensive TTL chip makes a versatile oscillator circuit...IFD, ED 12, p. 90

Inverter uses ferrite transformer to eliminate cross-conduction...IFD, ED 22, p. 130

Improved voltage-to-frequency converter has automatic polarity inversion...IFD, ED 11, p. 96

Inexpensive TTL chip makes a versatile oscillator circuit...IFD, ED 12, p. 90

Inverter uses ferrite transformer to eliminate cross-conduction...IFD, ED 22, p. 130

Keep your op-amp circuits quiet . . . ART, ED 20, p. 88
LED used as voltage reference provides self-compensating temp coefficient . . . IFD, ED 4, p. 92
Linear VCO made from a 555 timer . . . IFD, ED 21, p. 96
Low-cost dedicated divider comes trimmed to within 0.25% . . . PF, ED 18, p. 134
Low-cost temperature controller built with timer circuit . . . IFD, ED 17, p. 82
Low-distortion modulator and carrier source made at low cost with single dual op amp . . . IFD, ED 14, p. 68
Lowered feedthrough lets d/a performance shine through . . . PF, ED 19, p. 124
MOS alarm-clock chip drives gas-discharge display directly . . . IFD, ED 22, p. 128
Match antenna over 1.5-to-30-MHz range with only two adjustable elements . . . IFD, ED 19, p. 96
Mate synchros with computers . . . ART, ED 19, p. 72
Microvolt comparisons made with preamp and comparator . . . IFD, ED 16, p. 90
Modular v/f converter series offers choice of six models . . . PF, ED 22, p. 142
Motor control by PLL . . . ART, ED 9, p. 54
Multiplying d/a converters meet MIL specs at low cost . . . PF, ED 23, p. 124
Need a small keyboard? . . . ART, ED 2, p. 56
Need to operate SCRs in parallel? . . . ART, ED 18, p. 94
Operate a 555 timer on a ±15-V supply and deliver op-amp compatible signals . . . IFD, ED 2, p. 76
Optocoupler is zero-crossing detector and isolator in triac power control . . . IFD, ED 20, p. 104
Peak-holding analog memory can store data for 3 months . . . PF, ED 18, p. 136
Phase-control power modules handle 25 A at up to 240 rms . . . PF, ED 22, p. 146
Phase-locked loop generates clock from nonreturn-to-zero data . . . IFD, ED 9, p. 90
Power failure alarm operates a long time on a single 1.5-V cell . . . IFD, ED 23, p. 108
Power op amp provides ±100-mA output and up to 100-V/μs slew rate . . . IFD, ED 10, p. 146
Power op amps drive dc motor from single-ended power supply . . . IFD, ED 17, p. 80
Precision reference source eliminates power-supply regulation errors . . . IFD, ED 18, p. 108
Precision voltage reference easily converts to a current limiter . . . IFD, ED 2, p. 72
Prevent low-level amplifier problems . . . ART, ED 4, p. 62
Program multichannel audio gain . . . ART, ED 3, p. 68
Programmable sawtooth generator settable at high and low output levels . . . IFD, ED 23, p. 106
Programmable shaft-angle encoder works with any rotating shaft . . . PF, ED 10, p. 168

## Subject Listing

Circuits & Circuit Theory
Communications, Microwaves & Lasers
Components
Computers & Data Processing
Consumer Electronics
Displays & Electro-Optics
General Industry
Industrial Electronics
Management
Materials & Packaging
Medical Electronics
Microprocessors
Military & Aerospace
Semiconductors
Test & Measuring

Programmable unijunction transistor protects op amp from overvoltages . . . IFD, ED 3, p. 88
Pulse amplifier can deliver over 500 V with frequencies to 100 KHz . . . IFD, ED 20, p. 102
Ratiometric dual-slope a/d converters offered in 14-bit or 4-1/2-digit models . . . PF, ED 16, p. 102
Regulated power source drives low-power devices . . . IFD, ED 5, p. 72
Series-regulated supplies hurdle efficiency barrier . . . PF, ED 15, p. 84
Simplified three-phase generator has improved characteristics . . . IFD, ED 1, p. 122
Simplify acoustic surface-wave designs . . . ART, ED 16, p. 74
Single-chip pulse generator provides 50 MHz with adjustable duty cycle . . . IFD, ED 26, p. 72
Single potentiometer adjusts op-amp's gain over bipolar range . . . IFD, ED 15, p. 68
Speedy a/d converts input signals in less than 2 μs . . . PF, ED 19, p. 126
Square-wave frequency divider provides symmetrical output for odd divisors . . . IFD, ED 13, p. 100
Squeeze more data onto mag tape . . . ART, ED 21, p. 76
Squelch RFI in switching supplies . . . ART, ED 20, p. 96
Switch out microwave phase errors . . . ART, ED 13, p. 92
Switch your high-power supply . . . ART, ED 7, p. 116
Triple-output dc source protects against brownouts . . . PF, ED 12, p. 131
Triple-output dc supply ignores ac power failures . . . PF, ED 11, p. 107
Two components added to CMOS flip-flop convert it to one-shot or level detector . . . IFD, ED 17, p. 76
Ultrasonic transmitter/receiver generates a 20-ft beam that detects objects . . . IFD, ED 16, p. 88
Use v/f converters . . . ART, ED 7, p. 110
Voltage comparator circuit gives audio alarm when tripped . . . IFD, ED 10, p. 148
Voltage-controlled attenuator provides linear variation in decibels . . . IFD, ED 16, p. 86
Voltage-controlled music oscillator has linear control properties . . . IFD, ED 5, p. 66
Voltage-reference LED also provides visual indication of overload condition . . . IFD, ED 13, p. 98
Which multiplier? . . . ART, ED 21, p. 88
Wide-range voltage-to-frequency converter uses only one dual op-amp IC . . . IFD, ED 12, p. 96
16-bit d/a converter claims highest accuracy, lowest drift . . . PF, ED 19, p. 128
18-pin DIP houses speedy 8-bit hybrid a/d converter . . . PF, ED 20, p. 107
200-A motor controller provides high power in a small package . . . PF, ED 2, p. 85
400-Hz power supply for servos delivers up to 0.5 A at 11.8-V rms . . . IFD, ED 19, p. 98

### Communications, Microwaves and Lasers

Acoustic radar helping FAA study wind shear . . . NEWS, ED 22, p. 21
Better radar antennas tested by the FAA . . . NEWS, ED 11, p. 23
Coax and microstrip packaging edging out microwave waveguides . . . NEWS, ED 9, p. 26
Designers adapt as traffic begins to shift to a mix of speech and data . . . SR, ED 13, p. 44
Designers cramming more traffic into satellite communications net . . . SR, ED 19, p. 34
Digital methods and ICs are making receivers and transmitters smarter . . . SR, ED 13, p. 36
Dome radar cuts cost of phased-array system . . . NEWS, ED 13, p. 20
Dr. Ernst Alexanderson: A pioneer to remember . . . SR, ED 13, p. 68
FAA pushing new electronic aids to prevent flight into the ground . . . NEWS, ED 11, p. 30
Feedback laser emits several wavelengths . . . NEWS, ED 20, p. 24
Flat, flexible TV antenna offers high gain . . . IFD, ED 6, p. 98
Green-light laser maps stretch of ocean floor . . . NEWS, ED 25, p. 26
Improvements forecast in microwave gear . . . NEWS, ED 14, p. 23
Land-mobile radio designs push to 900 MHz to ease crowding . . . SR, ED 13, p. 54
Laser and radar systems speed pinpointing of targets . . . NEWS, ED 10, p. 19
Laser filter promises cheaper nuclear fuel . . . NEWS, ED 13, p. 20
Laser printer transfers data to ordinary paper . . . NEWS, ED 5, p. 19

# ANNUAL INDEX

Laser 'thermometer' to detect 80 million C...NEWS, ED 26, p. 16

Laser-TV bomb sight likely to raise accuracy...NEWS, ED 23, p. 20

Lasers help engineers to locate dummy position in auto crash tests... NEWS, ED 1, p. 61

MW system to help space shuttle land ...NEWS, ED 12, p. 39

Near real-time imagery from side-looking radar...NEWS, ED 5, p. 20

Need an 'invisible' vhf antenna in a vehicle? Open the door a bit... NEWS, ED 8, p. 32

New microwave semi fabrication pushing power and reliability up... NEWS, ED 2, p. 34

New OTH-B radar to be cw bistatic... NEWS, ED 8, p. 19

Over-the-rainbow radar to aid weather forecast...NEWS, ED 16, p. 22

Power levels reported rising for I-F to microwave elements...NEWS, ED 25, p. 28

Radar energy absorber eliminates 'ghosts'...NEWS, ED 4, p. 33

Satellites and fiber optics gain favor for the transmission of digital data ...SR, ED 7, p. 61

Semi laser pulser delivers 1000 W from 27-V battery...NEWS, ED 5, p. 19

Solid-state amplifiers crowd low-level TWTs...NEWS, ED 2, p. 19

Stop burnout in rf power amplifiers... ART, ED 1, p. 110

Waveguide transmitting speed boosted threefold...NEWS, ED 12, p. 26

YIG switch to handle high power radar pulse...NEWS, ED 19, p. 20

## Components

Bypass and feedthrough filters...ART, ED 17, p. 62

Complacent about resistor reliability? ...ART, ED 23, p. 92

Consider electromechanical counters ...ART, ED 21, p. 70

Consider hollow-rotor motors...ART, ED 11, p. 76

DIP relay is small in size and price... PF, ED 10, p. 164

Ferrites halve core loss in inverter applications...PF, ED 16, p. 97

FOCUS on Miniature relays...SR, ED 11, p. 56

FOCUS on Pots and trimmers...SR, ED 17, p. 52

FOCUS on Pulse transformers...SR, ED 13, p. 78

FOCUS on Snap-action switches...SR, ED 5, p. 44

Get to know digital shaft encoders... ART, ED 11, p. 68

Losses in flyback transformers halved by new ferrite cores...PF, ED 1, p. 127

Mini resistor chips offer the tops in accuracy and stability...PF, ED 23, p. 120

Mini time-delay relays are available in fixed, variable and flasher models ...PF, ED 11, p. 110

New push-button switch called world's smallest...NEWS, ED 16, p. 22

Process improves plastic-bound magnets...NEWS, ED 24, p. 23

Relay coil replaced by thermal actuator ...NEWS, ED 14, p. 24

Smaller, cheaper passive chips spurring hybrid-circuit advances...NEWS, ED 23, p. 26

Stepping motor curbs unwanted shaft motion...NEWS, ED 7, p. 22

Stretch electrolytic capacitor life... ART, ED 7, p. 124

Switch inside knob saves valuable space...NEWS, ED 10, p. 20

Switching contacts causing problems ...ART, ED 5, p. 60

Transducer simplifies image processing ...NEWS, ED 10, p. 19

Transient suppressor protects RF lines ...NEWS, ED 12, p. 26

## Computers & Data Processing

Algorithm said to guarantee data security for 100 years...NEWS, ED 9, p. 21

Analog signal processing moving to challenge digital...NEWS, ED 3, p. 21

Bucket brigade aids word processing ...NEWS, ED 4, p. 20

Build compact modems...ART, ED 1, p. 74

CDC challenges IBM on mass-storage tape...NEWS, ED 13, p. 19

Calculators taking over jobs once done by minicomputers...SR, ED 24, p. 58

'Classified ads' put into computer system...NEWS, ED 21, p. 23

Combine multichart Karnaugh maps into single, easy-to-handle versions ...IFD, ED 15, p. 70

Computer keeps tabs on 20 engine test points...NEWS, ED 5, p. 20

Computer series offers low cost, high performance...PF, ED 23, p. 116

Cram data through voice-grade lines ...ART, ED 4, p. 76

Data throughput doubled with new IBM link control...NEWS, ED 14, p. 23

Dazzling, dizzy Disney World is run by computer...NEWS, ED 4, p. 24

Dedicated systems giving rise to once 'far out' applications from sports scoring to security...SR, ED 10, p. 56

East German computer proves better than expected...NEWS, ED 26, p. 15

'Electronic checkbook' a specialized calculator...NEWS, ED 9, p. 22

Floppy disc/controller for $200 envisioned...NEWS, ED 18, p. 22

Floppy discs, cartridges and fixed-hard discs rise in use at savings to you ...SR, ED 22, p. 54

FOCUS on CRT terminals...SR, ED 22, p. 86

Full APL computer delivers mainframe power in mini size...PF, ED 24, p. 171

Growing family of small machines at $50 and up does complex math... NEWS, ED 2, p. 24

Harris offers new line of 24-bit computers...NEWS, ED 10, p. 20

High-school lab using floppy-disc time sharing...NEWS, ED 2, p. 19

Hot-air printer sears characters on paper...NEWS, ED 9, p. 21

How long a wait for computer response?...ART, ED 22, p. 120

'How to' emphasized at computer parley...NEWS, ED 6, p. 19

IBM desk computer designed for novices...NEWS, ED 3, p. 22

Improve analog data transmission... ART, ED 1, p. 94

Insecure computer problem: Ways sought to foil unlawful entry... NEWS, ED 5, p. 26

Keeping fast minis busy...ART, ED 10, p. 130

LSI to help create a new range of smaller, less expensive minis and mini peripherals...NEWS, ED 1, p. 38

Laser-computer system rejects defective POS codes at the press... NEWS, ED 8, p. 34

Latest scientific calculators displayed at conference...NEWS, ED 2, p. 19

Launch control for space shuttle to lean heavily on minicomputers... NEWS, ED 3, p. 21

Look at calculator languages...ART, ED 12, p. 80

Mass memories raising speed, dropping cost and storing billions of bytes ...SR, ED 22, p. 46

Medium-speed printers are on the way up—but the 'ideal' isn't here yet... SR, ED 22, p. 62

Mini's most important part...ART, ED 14, p. 52

Navy system pinpoints computer transients...NEWS, ED 22, p. 22

Network processor has unusual structure...NEWS, ED 21, p. 23

New computer aims to set speed record...NEWS, ED 2, p. 20

Next computer era: A gradual shift seen...NEWS, ED 22, p. 22

Novel ways of entering data are under study, including the power of positive thinking...SR, ED 10, p. 46

Productivity increased in new minicomputer...NEWS, ED 6, p. 19

Recognize hand-printed characters... ART, ED 3, p. 80

Reverse-Polish or algebraic entry... ART, ED 2, p. 50

Sensor-minicomputer network tells when lightning will strike...NEWS, ED 26, p. 28

Serial printer shuns the costly electronics...NEWS, ED 3, p. 22

Simplify add-on peripheral controllers ...ART, ED 10, p. 22

Small, nonimpact printer to cost less than $25...NEWS, ED 9, p. 32

'Smart' cable links computer to peripherals...NEWS, ED 3, p. 21

Speed microcomputer multiplication ...ART, ED 9, p. 44

Talking calculator is new aid for blind ...NEWS, ED 25, p. 26

Tomorrow's big computers are taking shape today; the changes are radical ...SR, ED 22, p. 36

Top computer show unfolds in Anaheim with spotlight on new directions in design...SR, ED 10, p. 90

With new, powerful software, designers can 'see' a system work before it's actually built...SR, ED 10, p. 80

Wraps come off a Naked Milli... NEWS, ED 4, p. 19

2 large computers join Univac line... NEWS, ED 7, p. 21

2 new calculator chips offered by Rockwell... NEWS, ED 4, p. 20

32-bit mini with 1 megabyte of core cycles at 450 ns average, 300 ns min... PF, ED 8, p. 87

### Consumer Electronics

CCD television camera sensitive to low light... NEWS, ED 24, p. 24

Computers to shop by beginning to turn up... NEWS, ED 20, p. 24

Consumer products to grow in sophistication with SOS and $I^2L$ and DMOS ... NEWS, ED 1, p. 52

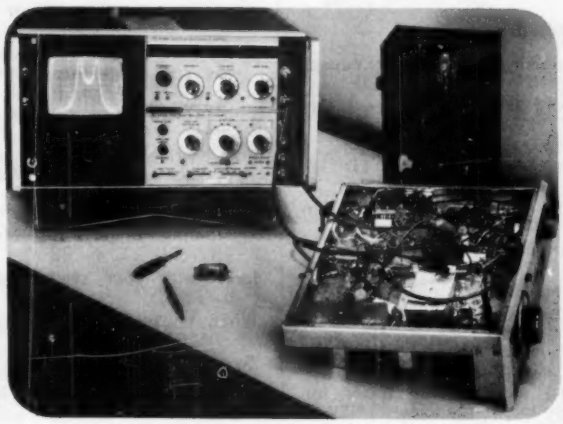
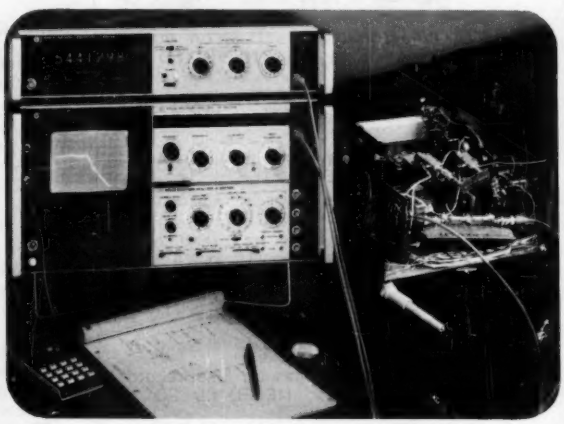
# THE SPECTRUM ANALYSIS

Select normal or variable persistence display, choose economy or high-resolution IF module.

Then pick or change your frequency range by simply plugging in the appropriate tuning module.





## 20 Hz to 300 kHz

**The 8556A tuner covers 20 Hz to 300 kHz and comes with a built-in tracking generator. It's calibrated for measurements in both 50 and 600 ohm systems, with accuracies better than ±1 dB.**

## 1 kHz to 110 MHz

**The 8553B takes you from 1 kHz to 110 MHz with −140 dBm sensitivity. Signals can be measured with ±1¼ dB accuracy. Choose the companion tracking generator/counter for wide dynamic range swept frequency measurements and precise frequency counting.**

No matter what range you're working in, you need reliable unambiguous answers. HP's spectrum analyzers give you accurate measurements over wide, distortion-free dynamic ranges, time after time. Easy operation too, with front panel markings that really help reduce the possibility of operator error.

But there's much more. Call your nearby HP field engineer or write for the full story on HP's spectrum analyzer spectrum.

Typewriter for handicapped uses special solenoid unit...NEWS, ED 7, p. 39

**Microprocessors**

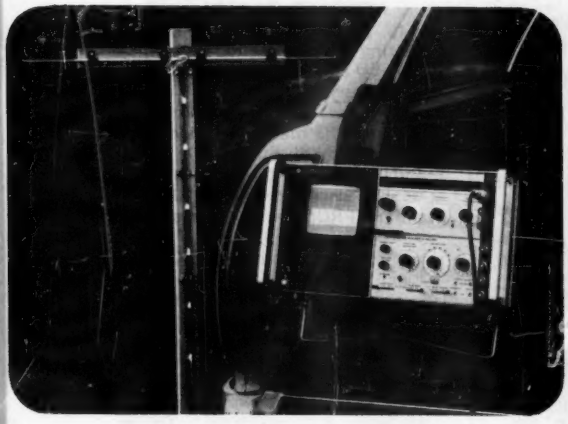
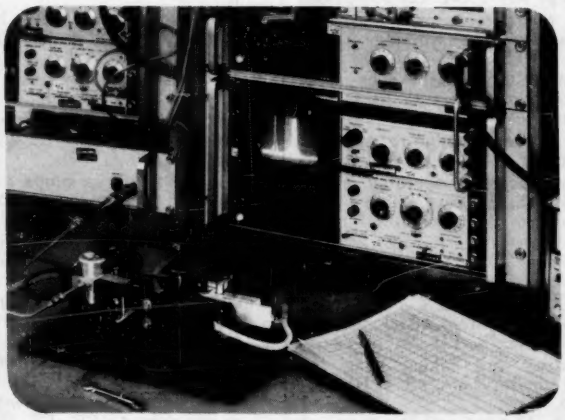
Microprocessors making medical equipment 'smart'...SR, ED 19, p. 26
Microprocessors simplify industrial control...ART, ED 22, p. 96

# SPECTRUM

## The HP 140 family covers it. Precisely. Conveniently. Completely. From 20 Hz to 40 GHz.





## 100 kHz to 1250 MHz

**Use the 8554B tuning section to cover the 100 kHz to 1250 MHz range. Measure with ±1¾ dB accuracy. Its companion tracking generator (500 kHz to 1300 MHz) also works with the 8555A tuning section.**

## 10 MHz to 40 GHz

**For 10 MHz to 40 GHz, choose the 8555A. Its internal mixer covers to 18 GHz, accessory mixer for 18-40 GHz. Maximum resolution is 100 Hz. Measure with ±1¾ dB accuracy to 6 GHz, ±2¾ dB to 18 GHz. For wide scans free from unwanted response between 10 MHz and 18 GHz, add the automatic preselector.**

Microprocessor DVMs, with new features, to hit the market shortly... NEWS, ED 16, p. 32

Microvolt probe traces PC current paths to help locate those defective ICs... IFD, ED 25, p. 90

Monitor circuit detects and shows voltage excursions outside set limits ... IFD, ED 10, p. 150

Op-amp scale expander allows high-resolution with ordinary voltmeter ... IFD, ED 21, p. 94

Oscillators calibrated with TV color signal... NEWS, ED 1, p. 21

Passive low-pass filter recovers signals buried in high ripple... IFD, ED 9, p. 92

Phase-meter specs can fool you... ART, ED 24, p. 112

Roll-your-own electronics can cut costs of high-quality equipment... NEWS, ED 3, p. 31

Select pin drivers cautiously... ART, ED 4, p. 82

Simple power-frequency meter built with only a few passive components ... IFD, ED 5, p. 68

Simpler and cheaper testers are urged for logic... SR, ED 18, p. 52

Small $10 magnetometer reported a rival of bulky kilobuck units... NEWS, ED 8, p. 30

Solve your measurement problems... ART, ED 15, p. 46

Squaring circuit generates second harmonic for controlled-distortion test signal... IFD, ED 8, p. 78

Systems DMM slashes price, yet holds performance... PF, ED 24, p. 153

Take oddball pulses in stride... ART, ED 24, p. 138

Test a/d converters digitally... ART, ED 25, p. 86

Test and measuring equipment growing in complexity to keep pace with brainier computers... SR, ED 10, p. 62

Test equipment proving its worth in ensuring transmission quality... SR, ED 13, p. 60

Test hybrid PC boards... ART, ED 24, p. 120

Test semiconductors... ART, ED 24, p. 128

Test that SCR turn-off time... ART, ED 6, p. 76

Test those LSI chips: Watch out for 'ifs' and 'buts'... SR, ED 24, p. 74

Uncover data-acquisition errors... ART, ED 10, p. 138

Voltage-to-frequency converter preserves polarity of input... IFD, ED 22, p. 120

3-digit DPM reads rms of complex waveforms... PF, ED 4, p. 106

3-3/4-digit panel meter is accurate to within 0.25%... PF, ED 7, p. 68

5-MHz spectrum analyzer averages signals digitally to cut noise... PF, ED 7, p. 66

**System soothers... from Wiley-Interscience**

☐ **PHASED-LOCKED LOOPS:**
Application to Coherent Receiver Design
**Alain Blanchard**

Here are the answers to all probable questions an engineer may face when designing and upgrading the operation of phase-locked loops. The author presents complete, systematic coverage of PLL and their direct application in communication, radiolocalization, time and frequency control, and instrumentation. Includes many useful graphs, formulas, and diagrams.

0-471-07941-3 1976 $22.50

☐ **FREQUENCY SYNTHESIZERS:**
Theory and Design
**V. Manassewitsch**

Here is a thorough, analytic treatment of system and circuit design information with descriptions of current design tools, recommendations for system design procedures,and an examination of synthesizer design problems. Features coverage of phased noise, spurious outputs analysis, measuring techniques, rf and digital circuits, numerous definitions, and more.

☐ **MICROPROCESSORS & MICROCOMPUTERS**
**Branko Souček**

With special focus on detailed descriptions of representative microprocessor families, MICROPROCESSORS & MICROCOMPUTERS describes the application, programming, and interfacing techniques common to all microprocessors. Topics examined range from digital codes, logical systems, organization, and high-level programming to Input/Output transfer modes, 4-, 8-, 12-,16-bit microprocessors, and addressing modes. Many programming and interfacing examples are also included.
